

ANDROID APP DEVELOER

As an Android developer, I integrate diverse tech stacks and build robust backend solutions for seamless mobile experiences. I have a foundational knowledge of Kotlin and am committed to enhancing my skills while exploring new Android frameworks in the future.

WORK EXPERIENCE

ANDROID APP DEVELOPER

TA Soutions

JULY 2024 - Present

Pharmaceutical Order Booking App (Bits Order Booking)

- Maintained and improved an order booking app helps pharmaceutical bookers.
- Optimized an SQLite database with custom stored procedures to ensure efficient data handling in a live, production environment.

State Agent Housing App (Get-Listings)

- Developed a real estate client app with location-based property listings and clustered map rendering for optimized spatial visualization.
- Implemented FCM push notifications for real-time updates and user engagement.
- Integrated Stripe payment gateway with secure tokenization for seamless transactions.
- Optimized API communication using Retrofit and GSON, ensuring efficient data serialization and network performance.

Arabic Education Portal (AAT-Abjadiyat)

- Enhanced and optimized the existing Spring Boot API to support multipart requests, handle CSV files, and utilize GraphQL queries for posting data from CSV to the AAT Portal.
- Deployed on an **AWS** EC2 Linux instance.
- Utilized Bitbucket, GitHub, and Git for version control.

TRAINEE ANDROID APP DEVELOPER

LogicsLabs Solutions

Dec 2023 - June 2024

Developed an Invoicing App (User Wasooli) that manages user profiles and displays billing history, current packages, and invoices with filters.

- Built the app using Java, XML, and local storage; integrated Firebase push notifications with a BroadcastReceiver, and used Volley for API calls.
- Implemented token-based login to restrict each account to a single user.

EDUCATIONAL HISTORY

BACHELOR IN COMPUTER SCIENCE FUUAST University Gulshan Campus

2022 - 2026

CERTIFICATION

CERTIFIED MOBILE APP DEVELOPMENT FAST CITY CAMPUS

3 Months Bootcamp

Gained hands-on experience in Android app development using Java.
